

## PROFILE

I'm a positive, self-imposed, and hard-working young woman from Hamina, Finland. I'm currently on my third year studying game programming in South Eastern Finland University of Applied Sciences. I've always loved playing games so learning to make them too seemed like a natural path for me when I got tired of working in retail.

I've done quite a lot of UI programming in my projects but I'm most into level editing and programming gameplay mechanics.
